Dear Sir or Madam:

I want to commend you for reaching a reasonable compromise in this matter, and putting a final end to the Clinton Administration's "War on Business."

If our Federal Government had fought terrorism during the prior administration with half the zeal they fought "big tobacco" and Microsoft, 5,000 Americans might be alive today. It is really wonderful having a new administration with some common sense.

Thank you for putting this shameful example of abusive government behind us.
